TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C/C++, SQL, Bash

Frameworks & Libraries: React, Next.js, Node.js, Express, Spring Boot, FastAPI, Django

Databases & ORMs: PostgreSQL, MongoDB, MySQL, Redis, Prisma, Mongoose

AI/ML & Robotics: ROS2, LangChain, TensorFlow, PyTorch, Scikit-learn

Cloud & DevOps: Docker, AWS, Google Cloud Platform, Linux, Git, CI/CD

Core CS Concepts: Data Structures, Algorithms, Operating Systems (OS), DBMS, Computer Networks (CN), OOP

EXPERIENCE

Full Stack Developer

December 2025 – February 2026

I2Global Virtual Learning

Bangalore, India

- Developed a Next.js student learning portal and Node.js admin dashboards, implementing dynamic page rendering (SSR) to improve load times by 30%.
- Optimized MongoDB query performance by designing compound indexes and aggregation pipelines, reducing average database response times by 25%.
- Integrated stateless session authentication using custom middleware and configured automated GitHub Actions workflows for continuous integration.

Backend Developer Intern

April 2025 – May 2025

Codtech IT Solutions

Remote

- Developed high-throughput REST APIs with Node.js and Express, implementing centralized exception handling and custom validation middleware.
- Designed normalized database schemas using Mongoose and Prisma, enforcing data integrity constraints to ensure zero-corruption data storage.
- Wrote automated unit and integration tests using Jest, achieving over 85% code coverage and preventing regression errors during development.

PROJECTS

MusicLocker - Music Catalog & Analytics Platform

music-locker-eight.vercel.app

Spring Boot, Next.js, TypeScript, PostgreSQL, Docker, Gemini API

- Architected a music catalog dashboard in Spring Boot and Next.js, deploying the frontend to Vercel and containerizing the backend using Docker for deployment on Render.
- Built a caching middleware proxy in Spring Boot to cache upstream API payloads, bypassing pagination limits and eliminating rate-limiting errors (HTTP 429).
- Integrated Gemini API to parse listening histories and generate personalized musical personas and recommendations via structured LLM prompt outputs.

Picky.Editor Chrome Extension

picky-editor.vercel.app

React, Tailwind, Chrome Extension API

- Developed a Chrome extension in React using Chrome Extension API (v3) to enable live DOM node inspection and element styling overrides.
- Engineered a recursive DOM traversal algorithm to generate an interactive hierarchy tree in real-time, matching DevTools inspection paradigms.
- Built a dynamic compiler to translate selected element properties into copyable Tailwind utility classes, accelerating UI prototyping.

Open VLA Powered Robot for Elderly Care

[IEEE Paper](#)

ROS2, AI/ML, Edge Computing

- Developed a modular ROS2-based robotics framework implementing speech-to-intent and visual action reasoning, reducing command-to-execution latency to under 10s.
- Designed a monocular depth estimation pipeline using MiDaS, replacing expensive LiDAR/depth hardware while retaining 95% object detection accuracy.
- Optimized and deployed neural network models onto NVIDIA Jetson hardware for offline inference; co-authored paper awarded **Best Paper Presentation (NMITCON 2025)** and published in IEEE Xplore.

EDUCATION

MS Ramaiah Institute of Technology

Bengaluru, Karnataka, India

Bachelor of Engineering (Electronics and Telecommunication)

Dec 2021 – Jun 2025
