TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Flask, Django

AI/ML: LangChain, Llama 3, TensorFlow, PyTorch

Cloud & DevOps: Docker, Kubernetes, AWS, Google Cloud Platform, Linux, Shell Scripting, System Administration

Databases: MongoDB, MySQL, PostgreSQL, SQLite, Redis

Developer Tools: Git, GitHub, Postman, VS Code, Jira, Chrome Extensions

EDUCATION

MS Ramaiah Institute of Technology

Bengaluru, Karnataka, India

Bachelor of Engineering (Electronics and Telecommunication)

Dec 2021 – Jun 2025

- Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Databases, Operating Systems

EXPERIENCE

Full Stack Developer

December 2025 – Present

I2Global Virtual Learning

Bangalore, India

- Built a responsive Next.js landing interface with 20+ reusable components and 9+ modular sections, leveraging SSR, dynamic imports, and asset/code optimization to reduce initial load time and maintain a lightweight client bundle.
- Streamlined API integrations and MongoDB queries for core workflows, while contributing 40+ Git commits through structured branching and continuous feature and performance refinements.

Backend Developer Intern

April 2025 – May 2025

Codtech IT Solutions

Remote

- Enhanced and optimized RESTful APIs using Node.js and Express for backend projects, improving response times by 40% and enhancing overall backend performance.
- Integrated secure user authentication and data validation mechanisms, reducing backend errors by 50% and increasing the reliability of project deployments.

PROJECTS

NoteSpot – Minimal Notes App | *Next.js, MongoDB, Docker* | github.com/szzd7223/notespot

- Built a minimalist full-stack notes application with secure JWT authentication and complete CRUD workflows, improving backend reliability and data handling efficiency by 30%.
- Designed a clean, modern interface using Next.js App Router, Tailwind CSS, Zustand, and Framer Motion, increasing UI responsiveness by 35% and enhancing overall user experience by 40%.
- Containerized the entire system with Docker Compose to enable one-command deployment and reduce environment setup time by over 40%.

Bank Management System | *Java, MySQL, JDBC* | github.com/szzd7223/Bank-management-system

- Created a banking desktop application using Java Swing with 30+ UI components and JDBC-driven transaction handling.
- Implemented 8+ core banking features including account creation, deposit, withdrawal, and fund transfer.
- Engineered the database workflow for 6+ transaction operations, ensuring atomic and consistent updates using JDBC.

AI-Powered PDF Knowledge Assistant | *React, FastAPI, LangChain* | github.com/szzd7223/pdf-chat-app

- Developed a full-stack AI assistant for conversational querying of large PDF document sets, integrating Llama 3 to deliver consistent and contextually accurate responses.
- Optimized document parsing, embeddings, and API pipelines, resulting in 40–50% faster preprocessing and sub-second response times for typical user queries.

ADDITIONAL EXPERIENCE

Managed social media for 19A RIT from November 2022 – December 2023

Presented a research paper titled *Open VLA Powered Robot for Elderly Care Tasks* at NMITCON in August 2025
